HOVENSA: The ERT submitted a class 1 permit modification request to extend the amount of time allowed for submitting its semi-annual corrective action status report. Extension would be to allow 60 days to prepare the report after collecting the semi-annual data, instead of the current 45 days.

Discussions continue regarding the upcoming outfall sampling by DESA. Plans are to schedule for sampling in late June 2018. We have reached out to the TPDES permit writer at DPNR to notify him of the upcoming visit, and to invite him to join EPA during the sampling effort.
